

Steve Wiley

Employed by SRA International, Steve Wiley manages all information and technology management support services provided by SRA to the Environmental Protection Agency (EPA). In this capacity, Mr. Wiley is responsible for SRA support to EPA's ENERGY STAR, Superfund, and Brownfields programs. Additionally, he leads SRA's effort to provide system engineering and specialized scientific support services to EPA's Office of Research and Development (ORD). He has spent more than five years consulting to EPA's Office of Environmental Information (OEI) and other program offices on how they can best apply information and technology to improve environmental results.

Mr. Wiley holds a Bachelor's degree in business from the College of William and Mary and a Master's degree in engineering management from George Washington University. Throughout his career, Mr. Wiley has applied his business and technology expertise to address healthcare environmental challenges. He helped build cardiology, immunology, and asthma disease management systems that accounted for the impact of environmental factors on risks and influenced treatment protocols. He has assisted in the design and architecture of environmental regulatory and research solutions related to pollution prevention and toxic substances. Mr. Wiley effectively bridges business and technology expertise with environmental and healthcare domain knowledge.
